

AlphaFold

AlphaFold is an AI program developed by DeepMind that predicts protein structures from amino acid sequences.

Databases

The necessary databases are pre-mounted on GPU nodes at `/alphafold_storage/alphafold_db` — no download needed.

Required Parameters

Parameter	Description
<code>-d <data_dir></code>	Path to the supporting data directory
<code>-o <output_dir></code>	Path to store results
<code>-f <fasta_paths></code>	Path to FASTA file(s). Multiple sequences in one file = multimer. Multiple files comma-separated = fold sequentially
<code>-t <max_template_date></code>	Maximum template release date (YYYY-MM-DD)

Optional Parameters

Parameter	Default	Description
<code>-g</code>	true	Enable NVIDIA GPU runtime
<code>-r</code>	true	Run final relaxation step
<code>-e</code>	true	Run relax on GPU
<code>-n</code>	all cores	OpenMM threads
<code>-a</code>	0	CUDA_VISIBLE_DEVICES — comma-separated GPU list

Parameter	Default	Description
<code>-m</code>	monomer	Model preset: <code>monomer</code> , <code>monomer_casp14</code> , <code>monomer_ptm</code> , <code>multimer</code>
<code>-c</code>	full_dbs	MSA database preset: <code>reduced_dbs</code> or <code>full_dbs</code>
<code>-p</code>	false	Use precomputed MSAs from disk
<code>-l</code>	5	Predictions per model (multimer only)
<code>-b</code>	false	Benchmark mode — excludes compilation time

Example Job Script

```
#!/bin/bash
#SBATCH --job-name=AlphaFold-Multimer
#SBATCH --partition=gpu2
#SBATCH --nodes=1
#SBATCH --ntasks=1
#SBATCH --cpus-per-task=4
#SBATCH --mem=32G
#SBATCH --gres=gpu:1
#SBATCH --output=alphafold_%j.out
#SBATCH --error=alphafold_%j.err

module load alphafold/alphafold_non_docker_2.3.1

bash $ALPHAFOLD_SCRIPT_PATH/run_alphafold.sh \
  -d $ALPHAFOLD_DB_PATH \
  -o ~/output_dir \
  -f $ALPHAFOLD_SCRIPT_PATH/examples/query.fasta \
  -t $(date +%Y-%m-%d)
```

Memory Guidelines

- **Monomer** — at least 32GB RAM
- **Multimer** — at least 64GB RAM; large/complex structures may need 128GB+

Additional Resources

- Sample FASTA: `/home/alphafold_folder/alphafold_multimer_non_docker/example/query.fasta`
- [alphafold_non_docker GitHub repository](#)
